Artwork for Healthcare Environments

STUDIO  HEALTHCARE

Introduction

We at STUDIO E/L are excited to present our newest sourcebook for Healthcare, Senior Living and Memory Care Environments. Within these pages, you will find our latest releases as well as our most successful artwork for healthcare settings. Our well-seasoned art consultants have curated a broad collection of pieces supported by Evidence Based Design theory, which strives to promote and enhance healing, a sense of well-being and calm throughout these important care interiors.

Skillfully selected healthcare art serves as a positive distraction for patients and their families as well as a proven source of stress relief for staff. Strategically placed artwork in Senior Living and Memory Care facilities serves to inspire the mind and stimulate the senses. These displays also hold the power to evoke memories and inspire conversation. Accordingly, a robust art program supports a more welcoming environment that is "de-institutionalized," friendly and accessible to all.

Our sourcebook provides a variety of styles and color palettes, and each page of the catalog features artwork that can be installed collectively – so you can confidently "purchase by the page" to ensure natural flow and continuity, knowing that each page of artwork is harmonized through complimentary subject matter and/or colors.

Our team of art consultants is prepared to consult with you to create your own inspired art program, and we partner with you through every step of the process including selecting artwork, budgeting, frame design, delivery and installation. We look forward to helping you create an uplifting and healthy environment through the benefits of visual artistry.
